The multiple award-winning, dual-action CCF-X2 drag system features twice the drag strength, twice the smoothness and half the startup inertia of the original CCF patented design. The dual-surface cork and carbon fiber (CCF) braking system is fully sealed using our proprietary ActivSeal technology. Other components included in the CCF-X2 brake are hybrid ceramic bearings and an oversized drag knob to adjust from zero to max in six full turns with our InfinAdjust system.

**THE X**
**UNMATCHED SMOOTHNESS, LIGHTWEIGHT**

The XCT drag is a sealed Teflon® and carbon fiber disc drag system. Dual Teflon® and dual carbon fiber drag surfaces deliver unmatched smoothness and allow for a lightweight construction for our favorite trout and light saltwater reel. Drag pressure is adjusted with a generous drag knob that offers a superior gripping surface and texture for wet and cold fingers.

**THE CCF-X2**
**TWICE THE SMOOTHNESS, HALF THE STARTUP INERTIA OF THE ORIGINAL CCF**

Our award-winning Nautilus® NV series of reels sport a larger, lighter and stronger version of the original CCF Disc Brake System. To reduce weight without compromising strength, we incorporated state-of-the-art titanium, stainless and ceramic components, and migrated to cold-finished 7075 series aluminum that is used for high-stress structural parts, such as aircraft fittings, missile components and defense equipment. Maintenance-free and fully sealed. The Brembo® brakes of fly fishing.

**THE NV-G**
**NV CCF DISC BRAKE SYSTEM™**

The Nautilus® GTX Pentadrag features an oversized, two-sided carbon fiber disc on one side and a cork/Kevlar®/carbon fiber hybrid on the opposite. Sandwiched in the middle are two laser cut cork and carbon fiber discs that complete the five braking surfaces of this massive brake assembly. The cork acts as a compression material to ensure a smooth drag transition while the carbon fiber delivers the market-leading overall smoothness that Nautilus® Reels is known for. The new Kevlar® support layer provides additional rigidity to the drag surface and spreads the pressure more evenly across the surface, insulating any heat generated by friction and dampening vibrations for the smoothest drag ever built.
THE NAUTILUS® X SERIES
AWARD-WINNING DRAG SYSTEM

NAUTILUS® X SERIES REELS
SMOOTHER, LIGHTER, STRONGER, BETTER

Open frame reel designed for lightness, strength and spool protection

• XCT drag: Carbon fiber and Teflon® sealed drag system
• Oversized drag knob for easy adjustment and textured for slimy, wet and cold conditions
• Giga arbor spool for fast line pickup and fast backing drying
• Dual palming rim offers better hand control and rear palming rim also protects spool from bending under impact
• Three frame sizes and four spools cover all fishing needs from 2 to 9 weight

FAVORITE NAUTILUS® REEL?

“The greatest thing about a Nautilus X reel is that I can fish for smallmouth, Musky, trout and bonefish with the same reel. Nautilus is definitely ahead of the curve...Super smooth drags and stylish color schemes. Extremely durable as well.”

~ Walker Parrott, Pro Guide

The 4” frame XL will accept the standard XL Giga arbor spool for a 6/7 weight and the XL MAX Giga arbor spool will fit an 8/9 weight line. At a mere 4.7 ounces the XL and XL MAX will handle your larger freshwater species and light saltwater needs perfectly. Reels are available in black or brushed silver anodizing. Custom Shop options available.

SPECIES:

XS: Trout, Panfish, Bass
XM: Trout, Panfish, Bass
XL: Steelhead, Bass, Bonefish, Snook, Redfish, Salmon, Carp, Steelhead, Sea Trout
XL MAX: Steelhead, Bass, Bonefish, Snook, Redfish, Salmon, Carp, Sea Trout, Pike, Stripers, Jacks, Peacock Bass, Baby Tarpon, Dorado, False Albacore

THE AWARD-WINNING NAUTILUS®
THE VERSATILE WORKHORSE

NAUTILUS® CCF-X2 REELS
THE WORKHORSE

• Classic Nautilus® design with oversized drag knob and ample range for the finest of adjustments
• CDF-X2 drag: Dual cork and carbon fiber braking system takes you from free spool to 20lb+ drag in six effortless turns to stop the ultimate predator or the tiniest of baitfish
• Lightweight to balance the newest lightweight rods but hefty enough for longer, heavier Spey rods
• Giga arbor spool for fast line pickup and fast backing drying
• Three frame sizes and four spools cover line weights 6-14

AVAILABLE IN FOUR MODELS

CCF-X2 6/8: WF-8 + 200 yds #30 7.6 oz.
CCF-X2 8/10: WF-10 + 200 yds #30 8.6 oz.
CCF-X2 10/12: WF-12 + 250 yds #30 8.9 oz.
CCF-X2 Silver King: WF-12 + 275 yds #30 9.1 oz.

Reels are available in black or brushed silver anodizing unless ordered in a custom color.

SPECIES:

CCF-X2 10/12: Steelhead, Salmon, Pike, Stripers, Jacks, Peacock, Bass, Tarpon, Dorado, False Albacore, Permit, Cobia, Sunbim, Tuna, Sailfish, Mahi-Mahi, Sharks
SILVER KING: Steelhead, Salmon, Pike, Stripers, Jacks, Peacock Bass, Tarpon, Dorado, False Albacore, Permit, Cobia, Sunbim, Tuna, Sailfish, Mahi-Mahi, Sharks, GT and all the other monsters that are a 15-hour flight away.

FAVORITE NAUTILUS® REEL?
“Why? The Silver King! I can use this reel for inshore or offshore because of its lightness and drag system. It’s a very versatile reel.”
— Captain Monique Newman

PROPRIETARY TECHNOLOGIES:

The CCF-X2 Silver King: 5 inch diameter, 9.1-ounce domination of all things silver. From salmon and steelhead in sub-zero temperatures to tarpon and billfish in melt-your-socks-off tropical latitudes, your drag setting will remain true and smoother than any other reel on the market.

Our dual-action CCF-X2 drag system delivers twice the drag strength (20lbs+), twice the smoothness and half the start-up inertia.

The CCF-X2 is fully-sealed and loaded with hybrid ceramic bearings, TPX bushing and an oversized drag knob with InfinAdjust range settings.
THE NAUTILUS® NV-G
LIGHTEST BIG GAME REEL IN ITS CLASS

NAUTILUS® NV-G REELS
NOTHING COMPARES: DRAG, DESIGN OR PERFORMANCE

• Classic Nautilus® design with the most intricate machining of all our reels
• Lightest big game reels in their class
• Patented NV-CCF draw bar cork and carbon fiber braking system. From zero to 12+ lbs in one and a half turns
• Ceramic hybrid bearings, thrust bearings, and a titanium drag shaft. Make this the drag system no one can touch (the patent also helps)
• Spey models: designed from scratch to cater to the two-handers with thick heads and thin running lines

NAUTILUS® GTX
8.7 OUNCES OF OPTIMIZED FIGHTING POWER

Nautilus® Reels GTX is in a class of its own. Designed to be fished beyond IGFA regulations, this reel is equipped to go head-to-head with your terminal tackle, and with a maximum drag of 25 pounds, the GTX is built to put the brakes on the fastest and strongest fish on the planet. Think GTs in the Indian Ocean with straight 100# leader, 80# core fly lines and oversized hooks. Think yellowfin tuna off the oil rigs with dozens of 200-yard runs and tackle busting stamina. Now you can think you actually stand a chance of landing it!

The GTX is a 5-inch diameter reel with a narrow 1.1-inch wide spool that holds 500 yards of 60-pound braid. The spool is lightweight and intricately machined with our Giga spool design to promote strength, maximum line pickup, and fast line drying to prevent corrosion when stored.

WHAT DO YOU LIKE MOST ABOUT NAUTILUS® REELS?

“There’s nothing like dependable, reliable, lightweight, indestructible reels.
I don’t have time for equipment failure.”

~ Captain Joe Gonzalez
**WHAT DO I LIKE ABOUT NAUTILUS® REELS?**

"Unprecedented reliability. They never fail, never slip and take endless abuse. Smooth drag, especially on start-up. The large retrieve for line pick up."

~ Oliver White, Ambassador

---

**THE** **NAUTILUS® CUSTOM SHOP** offers near limitless options and combinations. Most popular are custom anodizing services for frames and spools, and custom anodizing services for small parts such as drag knobs, spool release caps, brake covers and reel feet. Additional options are modifying some reels by adding big game handles, Hooks or custom engravings.

We offer custom fish engravings by renowned artists Jorge Martinez and Paul Puckett. Available color options for frames, spools and small parts are blue, red, green, violet, orange, gold and key lime.

**THE** **NAUTILUS® CUSTOM SHOP LIMITLESS OPTIONS AND COMBINATIONS & CUSTOM FISH ENGRAVINGS BY JORGE MARTINEZ AND PAUL PUCKETT**

- Custom colored housings & spools
- Nautilus® Hooker® accessory
- Custom color small parts
- Custom name or logo engraving
- Drag knob dials for perfect drag memory
- External backing markers for NV-G
- Custom logo engravings
- Saltwater fish engravings by Jorge Martinez: Tarpon, Bonefish, Permit, Snook, Stripper, Sheephead, Redfish, Bonefish Fly, Tarpon
- Freshwater fish engravings by Paul Puckett: Rainbow Trout, Brown Trout, Cutthroat, Steelhead, Atlantic Salmon, King Salmon, Carp, Muskie, Pike, Dorado
NAUTILUS REELS® EXCLUSIVE TECHNOLOGIES

GTX Pentadrag: Our amazing five drag surface cork/Kevlar®/carbon fiber hybrid braking system. The smoothest and best there is.

A sealed dual-action and quad surface Teflon® and carbon fiber disc drag system. Delivers unmatched smoothness and power in a lightweight package.

The CCF-X2 Disc Braking System is a dual-action cork and carbon fiber brake, delivering less than 1% start-up inertia. Hybrid ceramic bearings keep it running true at all pressures and on all fish.

NV CCF is our patented sealed cork and carbon fiber draw bar drag that delivers less than 1% start-up inertia. Hybrid ceramic bearings and a titanium draw bar keep the weight down and performance at its peak.

TPX Bushing: Our proprietary precision engineered thermoplastic TPX bushings are feather light, self-lubricating, inert (no corrosion) and have zero wear. The best!

The oversized CDF-X2 drag knob features the InfinAdjust drag control system. With six turns of the drag knob, you can go from zero to 20+ lbs, allowing you to precisely adjust your drag tension without fear of over adjusting.

Industry exclusive fly hooker that is attached to the reel foot for effortless convenience.

ActivSeal: Precision machined proprietary seal that actively repels water, sand, salt and grit to keep the Nautilus® brakes flawless.

Giga: The Uber arbors of fly fishing allow anglers to reel in up to 15” per turn. Intricately machined grooves let the bottom of the backing breathe to promote faster drying.

Laser-ID: Laser etched white spot inside of the spool to write the line weight on with a pencil or permanent marker.

FAVORITE NAUTILUS® REEL? WHY?

“NV-G 10/11 Monster, fastest retrieve on the market. Fish can no longer out run you.”

~ Captain Jeff Legutki

**Nautilus® Reels** manufactures fly fishing reels from their factory in Miami, Florida. Since 2003, Nautilus® has accelerated advancements in reel technology and set standards for performance while also supporting other U.S. companies.

All Nautilus® reels are designed and made in the United States. The aluminum and major components are sourced from across the U.S., and some parts are outsourced and manufactured at machine shops in Ohio and Massachusetts. The anodization work is done in Rhode Island and Pennsylvania, and all reels are turned and milled on U.S. manufactured CNC machines in their Miami factory.

Nautilus® Reels is also known for supporting local fly fishing shops in the United States and worldwide by only allowing sales to take place through those small businesses and their websites.

By thriving on innovation and staying ahead of the competition, Nautilus® Reels is able to manufacture in the U.S.A. Recognized worldwide as a leading fly reel manufacturer, Nautilus® has won more than a dozen awards for best fly reel.

Recognizing the responsibilities all people have to the environment, Nautilus® Reels has been outspoken on environmental issues and the need to protect ecosystems, including Bristol Bay, Alaska and the Florida Everglades. They support charitable causes, including Discover Courage and the Wounded Warrior Project, and are a sponsor of the multiple nonprofit fishing tournaments including the Keymorada Invitational Fishing Tournament which benefits the Crohn’s & Colitis Foundation.

*Nautilus® Reels is an equal opportunity employer.*
